Local & ski bus

The ski buses in St. Anton/St. Jakob and in Pettnau, Schnnau and Flirsch are labeled with route numbers. Blue local buses run in Lech and Zürs. These buses and the Warth-Schröcken ski bus (between Schröcken-Unterboden and Warth-Lechleiten) and the Lechtal ski bus are (for the purpose of alpine skiing and snowboarding) free of charge with a valid ski ticket.

Please note: Yellow Postbus buses between St. Anton/St. Christoph (part of the route is free of charge) and Lech Zürs are subject to a charge.

Sonnenkopf: A free ski bus runs several times a day from Stuben am Arlberg to the Sonnenkopfbahn valley station and back.

Safety on the slopes

The safety of all winter sports fans is of top priority. Everyone should therefore be familiar with the most important piste rules (FIS rules). In addition, boards with the heading **Check Your Risk** offer important information on avalanche danger, safety tips, and an avalanche transceiver check-point.

Ski runs are marked and prepared if possible; they are checked and secured against atypical alpine dangers, especially avalanches.

Ski routes are marked and only secured against the risk of avalanches; they are generally not prepared or checked, or only in some cases.

Warning lights:
 Yellow: Outside the safeguarded ski runs there is the risk of avalanches: Level 4 (= HIGH) or Level 5 (= VERY HIGH)
 Orange: Slope maintenance equipment in use

For information on the current slope conditions refer to the panoramic boards at the cable car stations.
 Flashing green or orange: Warning – queues! (Ski Arlberg app and www.skiarberg.at – always orange)

Ski run and ski route signs:
 = closed = open

Slope closures and avalanche blasting: It is forbidden and a chargeable offence to enter closed ski runs and ski routes. It is not permitted, without exception, to enter forested areas and walk or sledge on ski runs. From the last checking run, immediately after the last ascent, ski runs and ski routes are closed due to the danger from slope maintenance vehicles and cable winches. Please note: No safety cordons! When there is a risk of avalanches, never use closed runs. In order to safeguard their own safety, people on tours outside the safeguarded and open ski runs are responsible for obtaining information about blasting from slope management. Please note: During and after fresh snow falls there will be avalanche blasting in the area – risk of avalanches! Avoid areas with avalanche risk at these times! Information at the base stations. Skiing accidents: In the case of an accident, please report the accident with exact details using the emergency call point, nearest lift station or designated call point. For the telephone numbers for the ski run rescue service for the respective area, refer to the information block. The ski run rescue service is chargeable. Ski run preparation: The use of slope maintenance machines, also while the ski runs are in operation, cannot be avoided. Please be sure to keep a safe distance from these machines. Do not cross below slope maintenance vehicles on steep slopes as these may accidentally slip down. Where the view is restricted, in narrow passages or on cat-tracks, take extra care as slope maintenance vehicles may come the other way. Fresh snow: The Arlberg lifts and cable cars are well known for their efforts to offer perfect ski run conditions every day. However, when fresh snow falls it is unfortunately not always possible to prepare all runs at the same time, even with maximum deployment of slope maintenance equipment. Furthermore, in certain weather conditions fresh snow will not attach itself to the older snow covering below and will slip, forming heaps and bumps in spite of the preparation work. This cannot be prevented, even with the best ski run management.

For safe enjoyment in our ski area please follow the valid FIS regulations for skiers and snowboarders and above all be careful and considerate. The complete FIS regulations are available at many lift access points and at www.skiarberg.at
